

+ 4PET Recycling

4PET Recycling has closed the loop on food trays, recycling post-consumer PET trays back into food grade materials.

4PET Recycling B.V. in Duiven is a leading PET Recycling company. They have both, recycling lines for bottles as well as for food trays at their site. 4Pet looks back to a history of more than 30 years of PET recycling experience. Since 2018, 4PET Recycling has been part of Faerch Group.

As the first company in the world, 4PET Recycling has closed the loop on food trays, recycling post-consumer PET trays back into food grade materials at an industrial scale. At their world-leading tray-line, 4Pet produces flakes and pellets made from post-consumer PET trays, which we receive from waste managers across Europe. Leading manufacturers use their food grade flakes and pellets to produce new food packaging made from up to 100% recycled post-consumer content.

4Pets product portfolio comprises rPET flakes and rPET pellets (regranules). They serve both the bottle and thermoforming industry with high-quality products and supply to any European country.

For the flakes and pellets, high purity and quality are imperative in order to guarantee the highest safety level for our customers and the consumers. 4PET Recycling has therefore implemented an extensive quality control system and is following strict protocols and processing criteria. The recycling process complies with the strictest requirements for food contact material.

4PET RECYCLING

COMPANY INFORMATION
